EDUCATION

CUNY Queens College

Bachelor of Arts in Computer Science

Queens, NY

Expected Graduation: Summer 2026

EXPERIENCE

Scout

Product Manager

New York, NY

Oct 2025 – Present

- Drove product discovery and requirements definition for an early-stage startup, translating ambiguous objectives into structured problem statements, MVP scope, and prioritized backlogs.
- Delivered 20+ high-fidelity screens across onboarding, discovery, and profile flows within a 2-week sprint, maintaining stakeholder alignment and on-time demo readiness.
- Synthesized feedback across 2+ sprint cycles to balance user needs with technical feasibility, collaborating across 3 to 5 cross-functional teammates.

NASA L'SPACE

Project Manager

New York, NY

May 2025 – Sep 2025

- Led an 8-member cross-university team across 5 subsystems, running Agile sprint cycles, hosting 6+ weekly stakeholder syncs, and tracking milestones from discovery through delivery.
- Served as primary communicator to NASA reviewers, tailoring decision-ready materials to technical and non-technical audiences, achieving 100% submission approval.
- Synthesized 20+ NASA/IEEE sources into a feasibility analysis demonstrating 91% cost reduction and 74+ EVA hours saved per mission, used to support program leadership review.

Research Foundation of CUNY

Software Engineer Intern

New York, NY

Jul 2023 – Sep 2023

- Coordinated across 3 technical teams and 2 stakeholders, translating data requirements into structured deliverables that supported campaigns achieving an 80% client retention rate.
- Identified and scoped automated workflows that reduced data retrieval time by 15%, framing the problem, defining success metrics, and documenting measurable impact.
- Communicated findings to technical and non-technical leads, ensuring 100% of data requests were delivered accurately, on time, and aligned with stakeholder needs.

PROJECTS

EmpathiRead | [Click here to view Demo](#)

Hackathon

UC Berkeley, SF

Jun 2024

- Defined product direction and led judge walkthroughs, communicating accessibility features and design rationale to both technical and non-technical audiences.
- Scoped and positioned the solution within a 2,000+ participant competition, articulating its value in improving web accessibility for neurodiverse readers.
- Coordinated cross-functional teammates to deliver a fully functioning demo under time constraints, demonstrating scope management and on-time execution.

GreenIQ | [Click here to view Demo](#)

Hackathon

Columbia University, NY

Jan 2024

- Designed and pitched an interactive sustainability product to 10+ judges and 100+ attendees, tailoring narrative to both technical and non-technical audiences.
- Defined success metrics and tracked product impact: post-demo surveys indicated a 25% increase in environmental awareness among participants.
- Validated outcomes through structured user feedback: 3 in 4 participants reported learning new sustainability practices, informing future feature prioritization.

SKILLS

- **Product Management:** Requirements Definition, User Stories, Backlog Management, Roadmap Prioritization, Feasibility Analysis, Sprint Planning, Stakeholder Management, Agile/Scrum, Cross-functional Collaboration
- **Technical:** Figma, JavaScript, HTML/CSS, Git, Firebase, C++, Java, Unity
