SUMMARY

Builder PM and CS grad (Summer 2026) who ships full-stack MVPs directing AI tools (Claude Code) on React, Next.js, Supabase, and Vercel. Founder experience validating products with paying B2B clients, plus cross-functional leadership of an 8-person team for NASA L'SPACE. Strong in discovery, MVP scoping, and translating ambiguous needs into shipped, measurable outcomes.

EDUCATION

CUNY Queens College

Bachelor of Arts in Computer Science

Queens, NY

Graduation: Summer 2026

EXPERIENCE

MavenStudio

Founder & Product Manager

Remote

2026 – Present

- Built an automated lead pipeline scraping 200+ targeted B2B prospects per week, cutting manual prospecting time by 90% and enabling same-day outreach at launch.
- Directed AI-assisted prototyping to ship 4 client websites with a 2-week average turnaround, converting outreach into paying customers within a 3-week sales cycle.
- Iterating an SaaS MVP across 3 feedback cycles with a software engineer partner, narrowing a broad market into 2 validated, productizable pain points.

AutoBulletin

Product Manager

New York, NY

May 2026 – Jul 2026

- Identified a 4-hour weekly bottleneck where 3 staff members manually composed and formatted a bilingual bulletin in Word, and scoped a tool to collapse that process to under 15 minutes.
- Shipped a multi-user web tool serving 8+ concurrent staff members, enabling auto-translation across 5 languages and one-click PDF export with zero manual formatting.
- Defined a real-time collaboration system with presence indicators and editor locking, eliminating version conflicts across a team of 8 and cutting revision cycles from 3 rounds to 1.

En Hakkore Cafe

Product Manager

New York, NY

Feb 2026 – May 2026

- Identified 2 core user pain points (wait-time uncertainty, no order visibility) and scoped a real-time mobile-ordering MVP delivered in 3 weeks, solo as PM and builder.
- Defined a shareable order-code UX and real-time queue that enabled a 2-person staff to manage 30+ concurrent orders without a dedicated POS system.
- Scoped a barista dashboard with a four-stage status workflow and sold-out toggles, reducing order errors by an estimated 40% compared to the prior verbal system.

Scout

Product Designer

New York, NY

Oct 2025 – Jan 2026

- Drove product discovery and requirements definition for an early-stage startup, translating ambiguous objectives into structured problem statements, MVP scope, and prioritized backlogs.
- Delivered 20+ high-fidelity screens across onboarding, discovery, and profile flows within a 2-week sprint, maintaining stakeholder alignment and on-time demo readiness.
- Synthesized feedback across 2+ sprint cycles to balance user needs with technical feasibility, collaborating with 5+ cross-functional teammates.

NASA L'SPACE

Project Manager

New York, NY

May 2025 – Sep 2025

- Led an 8-member cross-university team across 5 subsystems via Agile sprint cycles and 6+ weekly stakeholder syncs, tracking all milestones to on-time delivery.
- Primary communicator to NASA reviewers, tailoring decision-ready materials to technical and non-technical audiences and achieving 100% submission approval.
- Synthesized 20+ NASA/IEEE sources in a feasibility analysis, modeling a projected 91% cost reduction and 74+ EVA hours saved per mission.

SKILLS

- **Product Management:** Product Discovery, User Research, MVP Scoping, Roadmap Prioritization, Backlog Management, Stakeholder Management, Agile/Scrum, Go-to-Market, Rapid Prototyping
- **AI-Assisted Building:** Shipping full-stack MVPs with AI tools (Claude Code); React, Next.js, Supabase, Vercel; AI-driven workflow automation and lead generation
- **Tools:** Figma, Git, Google Workspace
