EDUCATION

CUNY Queens College

Bachelor of Arts in Computer Science

Queens, NY

Graduation: Summer 2026

EXPERIENCE

413 Youth Club

Product Manager (Freelance)

Remote

Jun 2026

- Used AI tools and agentic development to personally build and validate a member management platform serving 30+ members, directing delivery rather than relying solely on engineering handoff.
- Gathered customer insights through direct interviews with staff, translating workflow pain points into a prioritized backlog in Linear that reduced registration processing time by an estimated 60%.
- Monitored product performance across payment tracking, registration conversion, and member management workstreams, using dashboard analytics to inform continuous backlog prioritization.

En Hakkore Cafe

Product Manager (Freelance)

New York, NY

May 2026

- Used AI assisted prototyping to validate a live order queue system before handing requirements to engineering, reducing back and forth and accelerating delivery for a 20+ weekly order operation.
- Gathered customer feedback and analyzed order flow data to identify a failure mode in the payment and tracking workflow, scoping the fix and validating the solution before it reached users.
- Maintained documentation and release communications across order status workflows in Linear, keeping the client aligned through each delivery milestone with no surprises at go-live.

Scout

Product Designer

New York, NY

Oct 2025 – Jan 2026

- Partnered with engineering and design to support the product lifecycle from discovery through delivery, mapping requirements in Figma and Miro and tracking the backlog across multiple workstreams.
- Gathered customer insights across 2+ sprint cycles and synthesized feedback in Miro to prioritize the backlog, balancing user needs with technical feasibility across a cross functional team of 5+.
- Supported product launches and release communications, delivering 20+ high fidelity Figma screens within a 2-week sprint and keeping stakeholders aligned through on time demo readiness.

NASA L'SPACE

Project Manager

New York, NY

May 2025 – Sep 2025

- Led an 8-member cross university team across 5 subsystems, running Agile sprint cycles in Google Workspace and Slack, building Gantt charts to track milestones from kickoff through final delivery.
- Used data and analytics to synthesize 20+ NASA/IEEE sources into a feasibility analysis documenting a 91% cost reduction and 74+ EVA hours saved, turning research into a decision-ready report.
- Communicated product progress and blockers to NASA reviewers through structured status updates tailored to technical and nontechnical audiences, achieving 100% submission approval.

Research Foundation of CUNY

Software Engineer Intern

New York, NY

Jul 2023 – Sep 2023

- Coordinated across 3 technical teams to track deliverables and ensure all data requests were completed accurately and on time, supporting campaigns with an 80% client retention rate.
- Analyzed data workflows to identify an inefficiency, scoped a process improvement reducing retrieval time by 15%, and documented the solution with measurable success metrics for leadership.
- Communicated findings to technical and nontechnical stakeholders, maintaining organized documentation that kept all parties aligned throughout the delivery lifecycle.

SKILLS

- **Product Management:** Backlog Prioritization, User Stories, Customer Discovery, Agile/Scrum, Product Analytics, Release Communications, Roadmap Planning, Stakeholder Communication, B2B SaaS
- **Technical:** Codex, Claude Code, CodeRabbit, Apify, MCP, Supabase, Vercel, GCP, CI/CD, GitHub Actions, Linear, Figma, Miro, Git, Google Workspace
