EDUCATION

CUNY Queens College

Bachelor of Arts in Computer Science

Queens, NY

Graduation: Summer 2026

EXPERIENCE

413 Youth Club

Founding Product Manager (Freelance)

Remote

Jun 2026

- Partnered with a freelance software engineer as a two-person founding team, owning all product strategy while they built the Next.js application serving 30+ active members.
- Defined the roadmap replacing Google Forms and spreadsheets, reducing registration processing time by an estimated 60% by automating approval and record creation workflows.
- Prioritized features for online registration, member management, and payment tracking, consolidating 3 manual tools into a single staff dashboard.

En Hakkore Cafe

Product Manager (Freelance)

New York, NY

May 2026

- Engaged as a freelance PM by a Korean church cafe, defining the product vision and roadmap for a mobile-first ordering platform handling 20+ weekly orders.
- Specified a real-time queue system using shareable order codes, keeping order tracking manageable for a 1-2 person staff while reducing wait-time friction for customers.
- Scoped a barista dashboard for live order management across up to 5 concurrent orders, defining status workflows that eliminated the need for verbal order confirmations.

Scout

Product Designer

New York, NY

Oct 2025 – Jan 2026

- Drove product discovery and requirements definition for an early-stage startup, translating ambiguous objectives into structured problem statements, MVP scope, and prioritized backlogs.
- Delivered 20+ high-fidelity screens across onboarding, discovery, and profile flows within a 2-week sprint, maintaining stakeholder alignment and on-time demo readiness.
- Synthesized feedback across 2+ sprint cycles to balance user needs with technical feasibility, collaborating with 5+ cross-functional teammates.

NASA L'SPACE

Project Manager

New York, NY

May 2025 – Sep 2025

- Led an 8-member cross-university team across 5 subsystems, running Agile sprint cycles, hosting 6+ weekly stakeholder syncs, and tracking milestones from discovery through delivery.
- Served as primary communicator to NASA reviewers, tailoring decision-ready materials to technical and non-technical audiences, achieving 100% submission approval.
- Synthesized 20+ NASA/IEEE sources into a feasibility analysis demonstrating a 91% cost reduction and 74+ EVA hours saved per mission.

Research Foundation of CUNY

Software Engineer Intern

New York, NY

Jul 2023 – Sep 2023

- Coordinated across 3 technical teams and 2 stakeholders, translating data requirements into structured deliverables supporting campaigns with an 80% client retention rate.
- Identified and scoped automated workflows reducing data retrieval time by 15%, framing the problem, defining success metrics, and documenting measurable impact.
- Communicated findings to technical and non-technical leads, ensuring 100% of data requests were delivered accurately, on time, and aligned with stakeholder needs.

SKILLS
